Many Elkay sinks and faucets are listed by the International Association of Plumbing and Mechanical Officials as meeting the requirements of the Uniform Plumbing Code. For specific information, go to www.iapmo.org.

Many Elkay sinks and faucets are listed with the Canadian Standards Association. For specific information, go to www.csa-

All Elkay top mount sinks are designed, engineered and warranted for top mount countertop installations only following our installation instructions. The only Elkay sinks designed and warranted for undermount solid surface countertop installations are those identified as undermounts or universal mounts. Most Elkay stainless steel sinks comply with the ASME A112.19.3. 2008/CSA B45.4-08 Stainless Steel Plumbing Fixture. Copy of Elkay's Warranty on sinks and faucets is available at www.elkayusa.com.

In keeping with our policy of continuing product improvement, Elkay reserves the right to change product specifications without notice.

CARE & CLEANING

Cast Brass

- General cleaning: use a non-abrasive, non-detergent soap with a soft cloth, rinse and towel dry.
- Never use abrasives, metal cleaners, scouring pads, lime or rust removal, alkaline-based, ammonia-based or acidic-based chemicals or cleaning products.
- Brass has a living finish and its surface tarnishes naturally. You can expect tarnish, scratches, and dents to appear in your sink over time.
- Surface waxing is recommended. Each sink provides a factory applied layer of wax. However, after time and use, this wax layer will need to be rejuvenated. Johnson's or Trewax Sealer Finish for floors is recommended. Do not use any waxes that contain polishing agents.

Copper - Antique & Hammered

- General cleaning: use non-abrasive, non-detergent soap and a soft cloth, rinse and towel dry.
- Never use abrasives, metal (copper) cleaners, scouring pads, lime or rust removal, alkaline-based, ammonia-based or acidic-based chemicals or cleaning products.
- Acidic foods such as juices and ketchup can remove the patina if left on the sink.
- Hard water spots and mineral deposits can be difficult to remove and may result in damage to the patina.
- Copper has a living finish and its surface tarnishes naturally. You can expect tarnish, scratches, and dents to appear in your sink over time.

Copper

- General cleaning: use an ordinary mild detergent and soft cloth, rinse and towel dry.
- Do not use harsh alkaline-based, ammonia-based, or harsh acidic-based cleaning chemicals or products.
- Never use abrasive cleaners or scouring pads.
- Copper has a living finish and its surface tarnishes naturally. You can expect tarnish, scratches, and dents to appear in your sink over time.
- Apply a coat of fine sink wax for added protection.
- Light scratches are normal for copper sinks; over time they will blend into the uniform finish pattern.

Fireclay

- General cleaning: use soapy water or vinegar-based cleaner and a sponge and towel dry.
- Water marks: wipe with damp cloth and towel dry.
- Difficult stains: use a 50/50 water/bleach solution or non-abrasive cleaners (follow cleaner manufacturer's instructions), rinse and towel dry.
- Do not use strong chemicals such as paint removers or oven cleaners, straight or undiluted bleach solution, abrasive cleaning products, scouring pads, steel wool or caustic solutions containing ammonia or alkalis.

Stainless Steel

- General cleaning: use an ordinary mild detergent and soft cloth, rinse and towel dry.
- Steel soap pads should never be used; particles can adhere to a stainless steel sink surface and will eventually rust.
- Light scratches are normal for stainless steel sinks; over time they will blend into the uniform finish pattern.
- Do not use dish mats as these can trap soap and dirt making sink maintenance more time-consuming.
- We recommend the use of an Elkay bottom grid or rinsing basket to protect your sink.

Stainless Steel Mirror

- General cleaning: use an ordinary mild detergent and soft cloth, rinse and towel dry.
- Never use abrasive cleaners, including steel soap pads
- Do not set hot pans directly into sink.
- Run cold water when pouring boiling water into sink
